

# Key Facts Sheet

## Business nbn® Fixed Wireless

Important information about the Business nbn® Fixed Wireless plan options available with Swoop.

Speed   How fast?	
 <p><b>Business nbn Wireless<sup>1,2</sup></b> <b>25 Mbps<sup>4</sup></b></p>	 <p><b>Business nbn Wireless Plus<sup>1,3</sup></b> <b>73 Mbps<sup>4</sup></b></p>
<p><sup>1</sup> nbn® Fixed Wireless Plus is a 'best efforts' service and is delivered without a typical evening peak guarantee. Business nbn® Wireless has a theoretical maximum speed of 25/2Mbps. Business nbn® Wireless Plus has a theoretical maximum speed of 100/20Mbps. Fixed Wireless speeds may be significantly impacted by congestion. Actual speeds to be confirmed after activation. If your service cannot provide the speed tier of your plan and this cannot be fixed, you can move to a lower speed plan or exit your plan at no cost.</p> <p><sup>2</sup> nbn® targets a minimum average download wholesale speed on a cell of 6Mbps, during the busy hours of the day (typically 7pm-11pm).</p> <p><sup>3</sup> Business nbn® Wireless Plus is expected to achieve the potential of 25Mbps at least once in a 24 hour period.</p> <p><sup>4</sup> This is the typical download speed you can expect during busy periods (7pm-11pm).</p>	
Price   How much?	
<p><b>\$79/month</b> Unlimited Data</p>	<p><b>\$89/month</b> Unlimited Data</p>
Use   What can I do with it?	
 <p><b>1 - 3 users</b> at the same time</p>	 <p><b>1 - 5 users</b> at the same time</p>

Notes	
<p><b>Technical Limitations</b></p> <ul style="list-style-type: none"> <li>• Your nbn® service will not work during power failures. This service does not include a battery backup power supply for nbn® supplied equipment or customer equipment. During a power outage your VoIP phone will not function, including calls to emergency services.</li> <li>• Your speed or performance may be reduced by a range of other factors such as your router, internal house wiring and wifi interference. Talk to us about what may be causing your slow speeds and we can suggest ways to improve the speed or performance.</li> <li>• Fixed Wireless services may be subject to performance limitations due to the distance or line of sight to the tower or other factors that cannot be fixed. In some circumstances, these impacts may be so great that typical plan speed information would not be an accurate representation of the speeds that could be expected on the service at any time of the day. Services experiencing high latency may have issues with VoIP services and gaming.</li> </ul> <p><b>Medical Alarms / Security</b></p> <p>Before acquiring an nbn® service, you should find out if any medical or security alarm services you want to use are compatible with an nbn® service. If any such services are not compatible, you should check with the provider to see what alternatives are available.</p>
